

KODJO KOUDAKPO

Economist | Macroeconomic and Fiscal Policy | Quantitative and Distributional Analysis

Montréal, Quebec, Canada | +1 438 221 4971 | kodjo.koudakpo@umontreal.ca | kodjokoudakpo.github.io

Canadian Permanent Resident | Citizen of Togo | English and French: Fluent

PROFILE

Economist with more than 5 years of international development experience, connecting macroeconomic, fiscal, and structural policies to firm performance, employment, household welfare, and regional outcomes. Across World Bank assignments, led or contributed to macro- and microsimulation, fiscal incidence analysis, country diagnostics, crisis monitoring, social protection operations, and policy dialogue in data-constrained settings. Research on fiscal rules, services trade, multinational activity, and innovation spillovers complements this operational experience by focusing on institutions, technology diffusion, productivity, and growth. Worked with government counterparts and national statistical offices in six countries and produced comparable socioeconomic indicators covering more than 35 African countries.

WORLD BANK GROUP EXPERIENCE

Economist-Statistician Consultant

Oct. 2024–June 2026

World Bank Group, Prosperity Vertical | Poverty and Equity Global Practice | Washington, DC

- Built macro-microsimulation frameworks linking economic shocks and fiscal reforms to household welfare, supporting policy dialogue on inclusive growth and resilience.
- Led welfare measurement in Eswatini and assessed proposed energy-tariff increases across income quintiles, informing discussions on reform sequencing and social protection.
- Co-led training for Eswatini's national statistical office and analytical work for the Water Security Diagnostic in Chad and Mali, including engagement with government counterparts.

Economist-Statistician Consultant

Aug. 2023–June 2024

World Bank Group, Prosperity Vertical | Macroeconomics, Trade and Investment Global Practice | Washington, DC

- Co-developed spatial clustering methods that combine household and ArcGIS data to delineate consistent subsistence zones across Burkina Faso, Chad, Mali, and Niger, and to examine livelihoods and regional disparities.
- Produced analytical inputs for Burundi's Poverty Assessment, connecting employment, education, demographic, and living-standard evidence to country policy questions.

Economist-Statistician Consultant

Feb. 2023–June 2023

World Bank Group, Prosperity Vertical | Poverty and Equity Global Practice | Washington, DC

- Produced analyses of multidimensional poverty, labor markets, education, and demographics for the Burundi Poverty Assessment and contributed to the Socio-Economic Profile of Refugees in Burundi.
- Constructed and validated multidimensional poverty indicators for Madagascar using DHS and MICS data, producing national, urban-rural, and regional profiles benchmarked against OPHI estimates.
- Integrated household welfare and conflict indicators into dashboards for the Democratic Republic of the Congo Crisis Observatory.

Economist-Statistician Consultant

July 2021–June 2022

World Bank Group, Prosperity Vertical | Poverty and Equity Global Practice | Washington, DC

- Analyzed ten rounds of High-Frequency Phone Survey and enterprise data on employment, income shocks, and coping strategies, informing crisis monitoring and social-safety-net targeting in the Democratic Republic of the Congo.
- Trained government counterparts in the Democratic Republic of the Congo on data collection and quality assurance; maintained regional indicators on employment, education, living standards, and shared prosperity.

Economist-Statistician Consultant

July 2020–June 2021

World Bank Group, Prosperity Vertical | Poverty and Equity Global Practice | Washington, DC

- Co-led discussions with Burundian government counterparts on monitoring evidence for the KIRA health project and the Merankabandi social safety net project.
- Designed automated Tableau validation and monitoring systems; analyzed beneficiary data on service delivery, targeting, and household outcomes; co-authored a World Bank report on health service delivery.
- Applied Python-based web scraping, text processing, and sentiment analysis to COVID-19-related Twitter data from the Democratic Republic of the Congo and Burundi, producing structured datasets, sentiment measures, and visualizations for policy analysis.

Economist-Statistician Consultant

July 2019–June 2020

World Bank Group, Prosperity Vertical | Poverty and Equity Global Practice | Washington, DC

- Assessed water-tariff reforms in Mali and Niger using fiscal-incidence analysis, quantifying welfare effects across income deciles to inform reform design, sequencing, and social protection targeting.
- Expanded comparable household survey indicators for living standards, labor markets, education, and distributional outcomes for country- and regional-level analysis.

Economist-Statistician Consultant

Oct. 2018–June 2019

World Bank Group, Prosperity Vertical / Poverty and Equity Global Practice | Washington, DC

- Produced inputs for Poverty Assessments, Systematic Country Diagnostics, Poverty and Social Impact Analyses, and concept notes across Sub-Saharan Africa.
- Assessed spatial price differences using CPI and household surveys from more than 35 countries;
- Harmonized surveys, constructed comparable indicators, and supported beneficiary monitoring for an agricultural operation in Chad.

TEACHING EXPERIENCE

Lecturer and Teaching Assistant

2020–2026

Université de Montréal, Department of Economics | Montréal, Canada

- Taught Econometrics, Economic Analysis Techniques, and Introduction to Economics to classes of more than 120 students; used Stata and MATLAB in quantitative instruction and supported Macroeconomic Theory and Introduction to Macroeconomics.

EDUCATION

Ph.D. Candidate in Economics

Expected 2026

Université de Montréal | Canada

Thesis submitted; defense pending. Fields: fiscal policy, macroeconomics, international economics, and development.

M.Sc. in Economics and Statistics, with Honors

2018

École Nationale de la Statistique et de l'Analyse Économique | Dakar, Senegal

M.Sc. in Applied Statistics, with Honors

2016

École Nationale de la Statistique et de l'Analyse Économique | Dakar, Senegal

DOCTORAL RESEARCH

- **Fiscal Rules and Fiscal Policy: A Quantitative Analysis.** Examines how fiscal institutions shape policy behavior and macroeconomic stabilization.
- **Services Trade Restrictions and U.S. Multinational Activity,** with Kodjovi Eklou. Studies how regulatory barriers affect multinational activity and international integration.
- **Innovation Spillovers from OECD Countries to Developing Countries,** with Kodjovi Eklou. Examines channels of international knowledge diffusion and implications for productivity and growth.

SELECTED ANALYTICAL AND KNOWLEDGE PRODUCTS

- *Trends in Non-Monetary Poverty and Labor Market Dynamics in Eswatini.* World Bank Group, 2026. With N. Shabalala and O. Nsababera.
- *Creating Consistent Subsistence Zones with Spatial Clustering for the Sahel Region.* World Bank Group, 2024. With G. Doherty and J. Hoozeven.
- *Monitoring Health Service Delivery in Burundi.* World Bank Group, 2021. With A. Jarotschkin, S. Sonne, and L. Rivera.

TECHNICAL AND LANGUAGE SKILLS

Quantitative and data tools: Stata, Python, R, MATLAB, Dynare, Tableau, ArcGIS, QGIS, Git, and Excel/VBA.

Text and digital data: Python-based web scraping, social-media text extraction, and preparation of unstructured text data for analysis.

Data: National accounts and fiscal indicators; LSMS, EHCVM, High-Frequency Phone Surveys, DHS, MICS, LFS, administrative, and geospatial data.

Languages: English (Fluent), French (Fluent), and Ewe (Native).
